VOLUME 52 1988 NUMBER 1

CONTENTS

A. YU. LEVCHENKOV: A problem of approach with two different pursuers and one evader 1
G. A. BESSONOV, V. I. KOROBOV and G. M. SKLYAR: The problem of the stable synthesis of bounded controls for a certain class of non-steady systems 5
V. A. UGRINOVSKII: Exponential stabilization of non-linear stochastic systems 11
L. V. DOKUCHAYEV: Stability of rotation of a deformable spacecraft 18
A. S. SUMBATOV: Some invariant relations in the problem of the motion of a body on a smooth horizontal plane 25
S. B. MALANOV and G. A. UTKIN: Shock interaction between a concentrated object and a one-dimensional elastic system 30
S. V. BOGATYREV and V. A. SOBOLEV: Separating the rapid and slow motions in the problems of the dynamics of systems of rigid bodies and gyroscopes 35
Z. S. BATALOVA and G. V. BELYAKOVA: Stability diagrams of the periodic motions of a pendulum with an oscillating axis 41
A. B. AIRAPETOV and E. M. ZHMULIN: On the axisymmetric screw motion of an incompressible viscous fluid 49
B. A. MALOMED and M. I. TRIBEL'SKII: On strong transitions between structures of differing symmetry accompanying weakly supercritical convection 53
S. N. TIMOSHIN: Elimination of edge rupture caused by the effect of flow pulsations 59
V. N. KRUTIN, M. G. MARKOV and A. YU. YUMATOV: Normal waves in a fluid-filled cylindrical cavity located in a saturated porous medium 63
I. S. ZORIN and YU. A. ROMASHEV: On the state of stress and strain of layered plates of non-symmetric construction 67
L. S. SRUBSHCHIK: Dynamic snap-through of an elastic shell subjected to a pulsed load 75
A. G. KULIKOVSKII and E. I. SVESHNIKOVA: Non-linear waves in slightly anisotropic elastic media 86
V. K. OPANASOVICH: Two approaches to the investigation of antiplane deformation of an isotropic solid with a thin elastic inclusion 90
A. A. EVTUSHENKO and YU. I. SOROKATYI: Extension of a composite plane with a thin elastic inclusion emerging orthogonally on a straight material interfacial line 94
V. I. KERCHMAN and F. M. ERLIKHMAN: A variational method of solving an elastic–plastic problem for a body with a circular hole 99
S. S. GRIGORYAN, S. V. DZHANASHIYA and G. V. RYKOV: A mathematical model of the deformation and failure of rock materials 105
B. E. POBEDRYA: Strength criteria of an anisotropic material 110
V. M. NAZARENKO: The spatial problem of the compression of a material along a periodic system of parallel circular cracks 113
V. B. ZELENTSOV: Asymptotic solutions of integral equations of crack theory problems for thin plates 120
A. N. GAIFUTDINOV and N. D. YAKIMOV: Comparison theorems for non-stationary pressure filtration problems 126
M. A. BRUTYAN and P. L. KRAPIVSKII: Hamiltonian formulation and fundamental conservation laws for a model of small elliptical vortices 130
G. A. LEONOV and A. V. MOROZOV: On the global stability of the forced motions of a liquid within an ellipsoid 133
L. A. FIL'SHTINSKII and L. A. KHIZHNYAK: Reaction of a piezoceramic shell to concentrated dynamical actions 136
D. G. PERADZE: On the paper by Kirichenko V. F., Krys'ko V. A. and Surova N. S.: The Bubnov–Galerkin method in the non-linear theory of hollow flexible, orthotropic multilayered shells 140

VOLUME 52 1988 NUMBER 2

CONTENTS

I. ROZYEV and A. I. SUBBOTIN: Semicontinuous solutions of Hamilton–Jacobi equations 141
A. B. AMINOV and T. K. SIRAZETDINOV: Conditions for a sum of forms to be of fixed sign and for stability of motion on manifolds 146
A. YA. KRASINSKII: The stability and stabilization of the equilibrium positions of non-holonomic systems 152
N. K. MOSHCHUK: A qualitative analysis of the motion of a heavy solid of revolution on an absolutely rough plane 159
V. A. GORODTSOV: Diffusion spreading of localized hydrodynamic disturbances under the action of random forces 165
E. V. TEODOROVICH: The phenomena of turbulent transport and the renormalization-group method 170
V. A. BABKIN: Anisotropic turbulence in a flow of incompressible fluid between rotating coaxial cylinders 176
A. V. MARCHENKO: Long waves in shallow liquid under ice cover 180
V. P. IVANOV: Excitation of low-frequency fields in a multimembrane chamber..... 184
I. G. BRYKINA: An analytical solution of the problem of convective diffusion in the neighbourhood of a discontinuity of the catalytic properties of a surface..... 191
N. KH. ARUTYUNYAN, S. S. GRIGORYAN and V. E. NAUMOV: The problem of a growing icicle 198
N. K. AKHMEDOV and YU. A. USTINOV: On St. Venant's principle in the torsion problem for a laminated cylinder 207
O. V. ONISHCHUK: On a method of solving integral equations and its application to the problem of the bending of a plate with a cruciform inclusion 211
E. L. NAKHMEIN and B. M. NULLER: The pressure of a system of stamps on an elastic half-plane under general conditions of contact adhesion and slip 223
A. N. BORODACHEV: A form of the particular solution of thermoelasticity equations for transversely isotropic bodies..... 231
V. I. KONDAUROV: Continual fracture of non-linearly elastic bodies 237
YU. N. GORDEYEV and N. A. KUDRYASHOV: Dynamics of normal separation crack growth during its cleavage by a flow gas 244
V. A. KOZLOV, V. G. MAZ'YA and V. Z. PARTON: Thermal shock in a domain with a crack 250
L. M. FILIPPOVA: Stability of a compressed elastic layer weakened by a circular crack 257
L. I. SEDOV: Gravitational acceleration in Minkowski space 260
A. N. ZHELTUKHIN: A family of exact solutions of the equations of the one-dimensional motion of a gas under the influence of monochromatic radiation 262
S. YA. MAKOVENKO: The influence tensor for an elastic medium with Poisson's ratio varying in one direction..... 263
P. I. PERLIN: Use of the Roben principle in solving three-dimensional problems of the theory of elasticity..... 267
B. E. POBEDRYA and P. V. CHISTYAKOV: Solution of three-dimensional problems of the theory of elasticity using the Monte Carlo method 270
A. L. GONOR: On an error in the theory of the conformal mapping of similar regions and its application to the flow past a profile 274

VOLUME 52 1988 NUMBER 3

CONTENTS

V. I. UKHOBOTOV: A linear differential game with constraints imposed on the control impulses 277
A. P. MARKEYEV: Asymptotic trajectories and the stability of the periodic motions of an autonomous Hamiltonian system with two degrees of freedom 283
V. I. VOROTNIKOV: The partial stability of motion 289
A. A. ZEVIN: A theory of linear non-conservative systems 300
L. D. AKULENKO: Study of the quasilinear oscillations of mechanical systems with distributed and lumped parameters 304
V. N. RUBANOVSKII: Quadratic integrals of the equations of motion of a rigid body in a liquid 312
V. A. VLADIMIROV: The instability of the equilibrium of an inhomogeneous fluid in cases when the potential energy is not minimal 322
I. V. SAVENKOV: Three-dimensional disturbances in a compressible boundary layer 328
N. N. BOBKOV and YU. P. GUPALO: On non-stationary motions of local inhomogeneities in a pseudofluidized layer 333
A. YU. BELYAYEV: Compression waves in a fluid with gas bubbles 344
V. G. KRUPA and G. A. TIRSKII: Asymptotic analysis of convective diffusion in problems with a discontinuity in the catalytic properties of the surface around which the flow takes place 348
O. M. GLADUN and V. S. FEDOSENKO: Non-linear standing waves of an elastic plate floating on the surface of a heavy liquid of infinite depth 357
N. A. KUDRYASHOV: Exact soliton solutions of the generalized evolution equation of wave dynamics 361
V. YU. PRUDNIKOV and YU. A. CHIRKUNOV: Group reduction of the Lamé equations 366
S. B. VIGDERGAUZ: The geometrical characteristics of equally-strong boundaries of elastic bodies 371
S. R. BRUDNYI and E. I. SHIFRIN: A method of symmetrizing functions and its application to certain problems in elasticity theory for non-uniform bodies 377
L. B. KUBLANOV and A. B. FREIDIN: Solid phase seeds in a deformable material 382
V. D. POTAPOV: The stability of growing inhomogeneously ageing viscoelastic bodies 389
M. KH. KHASANOVA: The orbital geometry of Jupiter's moons 394
N. A. VEKLICH and B. M. MALYSHEV: The plane problem of the impact of a plate on a liquid strip of rectangular cross-section 397
R. A. BRAZHE: Centrifugal waves in a progressively rotating fluid flow 402
L. KH. BELEN'KAYA: Asymptotic analysis of the stability of a cylindrical viscoelastic shell under the action of a longitudinal periodic load 405
A. I. POLUBARINOVA: A method of analysing plates and shallow shells 408

VOLUME 52 1988 NUMBER 4

CONTENTS

V. V. KOZLOV: On the symmetry groups of dynamic systems 413
A. YA. KRASINSKII and V. V. RONZHIN: Stabilization of the steady-state motions of mechanical systems with cyclical coordinates 420
F. L. CHERNOUS'KO: On the construction of a bounded control in oscillatory systems 426
ZH. A. MAMIROV: On stability when a singular point is non-isolated 434
E. M. SHAKHOV: The oscillations of a satellite probe towed on an inextensible line in an inhomogeneous atmosphere 440
A. I. DOKSHEVICH: The solutions of the equations of motion of the Kovalevskaya top in finite form 444
S. P. BAUTIN: Analytical construction of viscous gas flows using the sequence of linearized Navier–Stokes systems 449
N. M. BARASHKOV and F. F. SPIRIDONOV: Non-stationary flows in channels with permeable walls 458
V. V. NIKULIN: Conical rotational flow induced by tangential stresses on free plane surface 461
A. A. MAKHMUDOV and E. D. TERENT'YEV: The flow of liquid down an inclined plane at high Reynolds numbers 466
F. M. BORODICH: Problems of the interaction of a blunt body with an acoustic medium 473
YU. A. ANTIPOV and G. YA. POPOV: The plane state of stress of an elastic plane with two intersecting slits 479
N. M. BORODACHEV: A perturbation method for mixed three-dimensional problems of the theory of elasticity with a complex line of boundary-condition separation 488
V. V. ELISEYEV: The non-linear dynamics of elastic rods 493
A. A. ZELENIN and L. M. ZUBOV: Behaviour of a thick circular slab after buckling 499
V. M. ALEKSANDROV and D. A. POZHARSKII: On a contact problem for an elastic wedge 506
L. S. SRUBSHCHIK, A. M. STOLYAR and V. G. TSIBULIN: Asymptotic integration of non-linear equations of cylindrical panel vibrations 511
R. V. GOL'DSHTEIN and L. B. KOREL'SHTEIN: The method of asymptotic integration and the "method of springs" in problems of elastic plates with an elongated cut 518
L. N. GERMANOVICH, I. D. KILL and N. S. TSODOKOVA: Thermoelastic stresses in a half-space heated by a concentrated energy flux 525
G. A. DOMBROVSKII: On some special laws of non-linear filtration 533
V. A. BOROVNIKOV: The field of the point source of internal waves in a half-space with a variable Brunt–Vaisala frequency 536
A. P. CHUGAINOVA: The formation of a selfsimilar solution for the problem of non-linear waves in an elastic half-space 541
N. V. BOYEV and M. A. SUMBATYAN: Transient antiplane vibrations of a rectangular elastic slab 545
V. A. SITNIK: An approach to solving the problem of a crack in a wedge-shaped part of a plane 547

VOLUME 52 1988 NUMBER 5

CONTENTS

G. V. GORR and V. N. RUBANOVSKII: On a new class of motions of a system of heavy hinged rigid bodies 551
V. A. ATANASOV and L. K. LILOV: The stability of the steady-state motions of a system with pseudocyclical coordinates 555
A. A. VORONIN and V. V. SAZONOV: Periodic motions of gyroscopic systems 560
A. I. PANASYUK: Algebraic operations compatible with the dynamics of a non-linear discrete control system 569
V. I. MAKSIMOV: Dynamic modelling of unknown perturbations in parabolic variational inequalities 579
K. A. BEZHANOV: Multilayer flows of an incompressible liquid over an uneven bottom under the action of surface pressure 585
N. I. YAVORSKII: Non-axisymmetric submerged jets 593
S. M. TER-MINASYANTS and S. M. URMAMBETOV: Diffraction of a supercompressed detonation wave regularly reflected from the wall of an obtuse wedge 603
B. YA. KANTOR and M. P. KVITNITSKII: The plane problem of hydroelastic stability for a hinge-supported plate 611
S. K. KANAUN: Equilibrium of a homogeneous elastic medium bounded by a rectilinear stiff rod 616
V. K. VOSTROV: The compression of an unbounded body with semi-infinite cylindrical cavities 625
V. S. PROTSENKO: On two mixed problems of antiplane strain of an elastic wedge with circular holes 629
I. I. VOROVICH and L. P. LEBEDEV: On the solvability of non-linear shallow shell equilibrium problems 636
N. N. ROGACHEVA: Forced vibrations of a piezoceramic cylindrical shell with longitudinal polarization 641
V. N. PIVOVARCHIK: On the vibrations of a semi-infinite beam with internal and external friction 647
V. A. POPOV: Axisymmetric flexural oscillations of a thin disc 653
O. D. PRYAKHINA and O. M. TUKODOVA: Antiplane dynamical contact problem for an electroelastic layer 659
S. M. AIZIKOVICH and I. S. TRUBCHIK: Asymptotic properties of the approximate solution of a class of dual integral equations 664
A. G. BOYADZHI, M. L. BURYSHKIN and M. V. RADIOLLO: The action of a rigid stamp on a half-plane weakened by a regular system of cracks 670
S. B. MALANOV and G. A. UTKIN: Skew impact of a material point on an infinite string lying on an elastic support 674
A. A. NEPOMNYASHCHII: Spatially modulated convective motions in a vertical layer with curved boundaries 677
E. N. BERESLAVSKII and V. N. EMIKH: On the critical filtration mode with evaporation at the border zone separating fresh waters from saline waters below 680
V. V. KOBELEV: Isoperimetric inequality in the problem of the stability of a circular ring under normal pressure 683
V. N. YUZEVICH: Electromechanical thermal diffusion processes in contacting bodies with point defects 686

VOLUME 52 1988 NUMBER 6

CONTENTS

V. V. KOZLOV: A constructive method of establishing the validity of the theory of systems with non-retaining constraints 691
A. P. IVANOV: A constructive model of impact with friction 700
B. ATAZHANOV and E. M. KRASINSKAYA: Stabilization of the stationary motions of non-holonomic mechanical systems 705
V. N. RUBANOVSKII: On the relative equilibria of a satellite-gyrostat, their branchings and stability 710
L. K. KUZ'MINA: Admissibility of simplified equations in the dynamics of gyroscopic systems 715
V. A. BRUSIN and YU. M. MAKSIMOV: Continuous modal control of linear multicoupled objects 720
S. N. OSIPOV and A. M. FORMAL'SKII: The problem of the time-optimal turning of a manipulator 725
V. F. BORISOV and M. I. ZELIKIN: Modes with switchings of increasing frequency in the problem of controlling a robot 731
V. L. BERDICHEVSKII: The connection between thermodynamic entropy and probability 738
S. I. CHERNYSHENKO: The asymptotic form of the stationary separated circumfluence of a body at high Reynolds numbers 746
S. V. KHABIROV: The non-stationary invariant solution of the equations of gas dynamics describing the spreading of a gas into a vacuum 754
A. M. GOLOVIN and A. F. ROGOVOI: Effect of spherically symmetric mass flow from the surface of a particle on the force of interaction with a plane surface 761
V. S. BERMAN and A. D. POLYANIN: Mass transfer in a pulsating bubble 766
K. G. KORNEV and V. A. CHUGUNOV: Determination of the equilibrium shape of the bodies formed during the solidification of filtration flow 773
YU. I. SAPRONOV: Multimode bifurcations of elastic equilibria 778
A. G. KULIKOVSKII and E. I. SVESHNIKOVA: The decay of an arbitrary initial discontinuity in an elastic medium 786
A. S. KOPETS: Construction of discontinuous solutions of the equations of plane elasticity theory by the method of generalized functions 790
V. V. NOVIKOV: On the instability of elastic shells as the manifestation of internal resonance 797
N. N. PETROV: A group pursuit problem with phase constraints 803
V. A. KUZ'MINYKH: On an integrable case of perturbed Keplerian motion 806
A. A. BUROV: On the use of extensions of the real number field to seek completely integrable Hamiltonian systems 809
V. A. KORNEYEV: Optimal synthesis in the problem of impulsive correction of motion 811
A. YA. TSIONSKII: Stability of a cylindrical shell in a stratified flow 814
I. P. GETMAN and O. N. LISITSKII: Reflection and transmission of sound waves through the interfacial boundary of two joined elastic half-strips 816
